

Vacante de empleo

FECHA SOLICITUD	24/02/2016
NOMBRE DEL PUESTO	Software Developer
DESCRIPCIÓN	<p><i>Okay, so what does the role of a Software Developer at Datapoint Europe involve?</i></p> <p>Innovative, Agile development, create high-quality software that is easy to install and gives our customers everything they need to make their businesses profitable.</p> <p>You will be focussed on creating cutting edge software for our products.</p> <p>Our developers have the freedom to get on and do things for themselves. This makes it an ideal environment for self-motivated developers – particularly people who are able to challenge and innovate without compromising on quality.</p>
TAREAS PRINCIPALES	<p><i>Not bad, who do you look for?</i></p> <p>We look for people with the right cultural fit. That means being passionate and enthusiastic and having what it takes to drive our business forward. We also look for people who are keen to develop new knowledge and skills, because our growth is ultimately dependent on yours.</p> <p>You will play an important role in driving change within our business, joining a department that is continually on a journey of change.</p>
REQUISITOS	<p><i>To be considered for this position, we want somebody with:</i></p> <ul style="list-style-type: none"> - Solid background in all aspects of software development - Knowledge in (or willing to learn) continuous integration and continuous delivery - Experience of (or willing to learn) Agile development methodologies e.g. Scrum & Kanban - A concern for delivering quality, following Clean Code and TDD principles - Strong communication & collaboration skills - Good level in English, written and spoken <p><i>Yeah sure whatever, but is here any technologies you want me to have experience with?</i></p> <p>Some technologies we're using so far:</p> <ul style="list-style-type: none"> - Programming languages: Java, NodeJS - Frameworks: Spring, AngularJS, Bootstrap - Relational databases - Cloud & Virtualization: AWS, Docker - VCS and CD tools: Git, Jenkins, Jira <p>It's not mandatory to know all this technologies, but obviously the more you have worked with, the better.</p> <p><i>Oook... this is a rather standard stack, any chance you're open to use any "cool" technology?</i></p> <p>Sure! In fact, because of our innovative nature, the PoCs that we usually have to do are a good chance to play with whatever you think is a good fit, so we'll expect from you to be able to get out of your comfort zone and give any new technology a try.</p>
