The institute Integriert Studieren www.jku.at/iis provides services for people with disabilities, with special focus on information and communication technology. Research is currently undertaken in the fields of "Assistive Technologies", "eAccessibility", "Mathematics & Games" and "Social Integration".

We want to strengthen our team and are therefore looking for a computer scientist (m/f)

Your task:

- Collaboration at scientific projects in the fields of "Assistive Technologies", "eAccessibility" and "Mathematics & Games
- Collaboration at teaching in the same topics

Your qualifications:

- Academic studies of computer science or a comparable education (University, College)
- Practical experience in (accessible) web development and programming
- Excellent programming skill in at least two of the following languages: Java, C#, C/C++, Objective-C, PHP, Actionscript, JavaScript
- Very good English language skills

We offer:

- Absorbing work with our experienced team
- Expanding experience in the field of scientific research (PhD)
- Excellent work atmosphere as well as flexibility in flat hierarchies
- Gross salary according to the University collective agreement for employees at least € 35.400,-/year.

Interested candidates are required to prepare a two part application:

The first part should contain the CV, the second part an abstract of the applicant's Master thesis (or a selected project).

Please send this short application till November 30th, 2012 by e-mail to priska@jku.at.
