SENIOR PHP PROGRAMMER

We are looking for web developers with solid experience in PHP/MySQL, passionate for programming and focused on performance and quality. If Dry, Solid and Kiss means something to you, you will feel like home with us.

What we offer:

- Latest technologies and projects diversity (Softonic Web, Desktop applications, Mobile, big data CDN, search engines).
- Continuous learning (Technical mentoring, Courses, Workshops, Conferences & Events, Technical library).
- Agile Methodology (Scrum, TDD, continuous integration).
- Industry standards compliance, mandatory Unit Testings, code quality enforcements;
- Work closely with proven experienced professionals of the sector.

QA SPECIALIST

We are currently looking for a new member of our Quality Assurance Team and your main tasks will be:

- Participate in project-wide reviews of requirements, system architecture, and detailed design documents.
- Provide the QA Manager with accurate and precise estimates for assigned task duration, along with confidence levels and foreseeable dependencies.
- Develop, document and execute test cases for the product under test.
- Effectively communicate testing activities and findings in oral and written formats.
- Focus on the important testing and project priorities as agreed-upon with the QA and Project managers.
- Assist in the gathering and formatting of information for test results reporting.
- Perform the overseeing of all reported bugs in the bug tracking system for the projects assigned.
- Participate effectively in estimation, planning, cost-of-quality, quality risk analysis, implications of known bugs and the impact of proposed changes to product definition on the testing process.

QA AUTOMATION SPECIALIST

Your main responsibilities will be:

- Participate in a test automation tool selection process for an automated component testing harness in a Java/TestNG/Ant environment.
- Develop and execute automated tests using the selected tool, which will likely require programming in Java and scripting languages.
- Perform static analysis of source code using complexity metrics.
- Integrate the test suites into the test management system and custom test harnesses.
- Work with the Architecture team to create and maintain automated nightly build verification (smoke tests).
- Ensure proper version control and configuration management of all test objects developed and test environments used.

ANDROID DEVELOPER

Duties & responsibilities of this role:

- Develop new features in Softonic's Android app, MOBA
- Maintain the Android app.
- Performing source code reviews and/or manual analysis for Android Code.
- Propose technologies or architectures for improving Android Apps
- Follow up of the 0 bug policy in Production

FRONT END DEVELOPER

We are currently searching a Front-End developer with web graphic design abilities and advanced knowledge in HTML, CSS and JavaScript to join our multidisciplinary development team and work on high performance projects.

What we offer:

- Latest technologies and projects diversity (Softonic Web, Desktop applications, Mobile).
- Continuous learning (Courses, Workshops, Conferences & Events, Technical library).
- Agile Methodology (Scrum, TDD).
- Crossbrowsing and W3c compliant.
- Work closely with proven experienced professionals of the sector.
