In the 1500s, the prevailing ideology was that Earth is the center of the universe and that all other planets and moons revolve around it, based on a doctrine by Aristotle.

validate this information, but und evidence that Venus bited the sun, not Earth. His dings discredited Aristotle's aim.

Galileo published books on his theories, including Dialogue Concerning the Two Chief World Systems, which sought to disprove the original theory.

This allowed others to find his work.

allowing us to experience events and news igh virtual reality. Stories feel more real through verification of experience. But, how can we re that our experiences haven't be edited?

nple – UN used VR to create a 360 degree t inside of a refugee camp.

Creates an illusion of trust because it's not controlled by big corporations. But, citizens car manipulate truth.

Example – an eyewitness report about Steve J heart problems resulted in an 10 percent apple decrease, then turned out to be false.
